MY CAREER GOAL

Becoming a Professional Video Editor

Introduction

My career goal is to become a professional video editor. I enjoy creative work and want to learn how to turn raw footage into interesting and meaningful videos. Video editing combines creativity, storytelling, music, and technology.

Skills I Want to Develop

I want to improve my editing skills step by step and learn how to create videos for social media, YouTube, businesses, and personal projects.

Technical Skills

I plan to learn video cutting, trimming, transitions, text and titles, colour correction, background music, and audio editing. I also want to practise with software such as Adobe Premiere Pro and After Effects.

My Learning Plan

I will attend classes regularly, practise the tools taught by my instructors, and complete small projects to build a portfolio. I will accept feedback and keep improving with every project.

Practice Project Plan

Practice Item	Quantity	Estimated Cost (₹)
Short social media video	2	0
YouTube vlog edit	1	0
Portfolio sample video	1	0

Conclusion: With regular practice, patience, and creativity, I hope to become a skilled video editor and work on professional projects.
